# LinguaPlone Product in 10 Minutes

---

Brian Gershon

RagingWeb.com

---

## What does language translation involve?

---

- Plone's templates are already translated in 35 languages; your browser determines your default language
  - COVERING TODAY: Translating your site's content
  - TOUCH ON: Translating your skin templates
- 

## Translation-related Plone Products

---

- PloneLanguageTool for managing flags, changing languages, control panel options. (included in Plone 2.5)
  - LinguaPlone for allowing you to easily translate your content (v0.9 or trunk recommended)
  - I18NFolder for translating a folder without duplicating your items (v3.0beta8) (unsure about Plone 2.5 compat)
  - i18ndude for managing translation files used in your templates
- 

## Plone Language Tool

---

- Adds a control panel interface for choosing languages available on site, and some language settings

allowed?	language ^	language (english)	code
<input type="checkbox"/>	Afrikaans	Afrikaans	af
<input type="checkbox"/>	Aymara	Aymara	ay
<input type="checkbox"/>	Azəri Türkçəsi	Azərbaycanca	az

---

## Translating your content with LinguaPlone

---

- Allows Archetype-based content-types to be translated field-by-field (i.e. custom DocumentImage)
- LinguaPlone translation in action:

## Editar Página

por [admin](#) - Última modificación 04/04/2007 07:07

Traduciendo de English a Español

### Title

Welcome to Plone

### Título

### Description

A short summary of the content

Congratulations! You have successfully installed Plone.

### Descripción

Una breve descripción del contenido.

- Recommend using trunk version (of v0.9) due to [bug when editing root content](#).

---

## What about my own custom content-types?

---

- Essentially, just need to add this to your main archetype file:

```
from Products.ATContentTypes.config import HAS_LINGUA_PLONE
if HAS_LINGUA_PLONE:
    from Products.LinguaPlone.public import *
else:
    from Products.Archetypes.public import *
```

---

## LinguaPlone in Action

---

- Walking through a live multilingual site

- Adding Translations, Managing Translations, Right-to-left support (eg Arabic) Homepage Chooser, Language Chooser

---

## Template Translation

---

- Out of scope for this talk... but you can ask questions at the end :)

- Plone has excellent template translation capabilities
- i18ndude is your friend for managing translation files used in your templates
