

Integrating Plone with E-Commerce and Relationship Management

**A Case Study in Integrating
PloneGetPaid and Salesforce.com**

David Glick

Idaho Conservation League

Idaho Conservation League

The screenshot shows the website's layout. At the top, there is a navigation bar with links for Home, Site Map, Join, Events, Hikes, and Media Room, along with a search box. Below this is a secondary navigation bar with links for Home, About, Issues, Tools And Resources, Get Involved, and ICL Community. The main content area features a large photograph of three people sitting on a rocky mountain trail. Below the photo is a dark banner with the text: "The Idaho Conservation League preserves Idaho's clean water, wilderness and quality of life." and a link "Learn more about us...".

On the left side of the page, there is a vertical green bar with the text "BECAUSE YOU LOVE IDAHO" and the Idaho Conservation League logo. The logo includes a stylized landscape with mountains and a sun, and the text "Idaho Conservation League".

The main content area also features two articles:

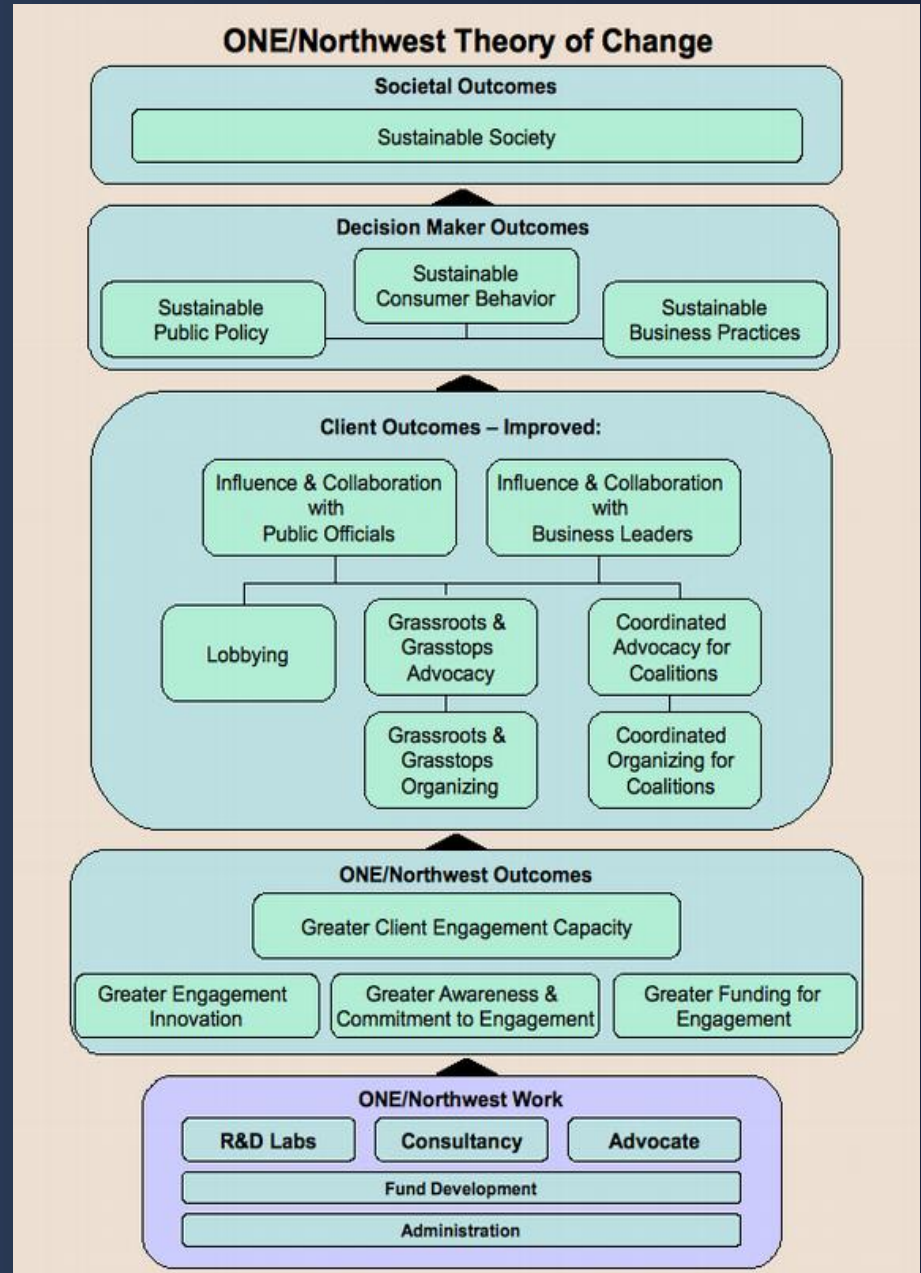

- 350 Sending Out an SOS**
What's all the buzz about 350 ppm?
It's the amount of CO2 Earth's atmosphere can handle. Sign our [petition](#) and join us in Sandpoint for a [Save Our Snow Rally](#) and bike ride!
- Green Living Tips**
[Community Amenities Improve Health](#)
Community access to parks, sidewalks, and farmers' markets makes for healthier families. [Read more...](#)

On the right side, there is a sidebar with the following sections:

- DONATE TODAY** (with a right-pointing arrow)
- INFORMATION FOR:**
 - [Members](#)
 - [Outdoor Enthusiasts](#)
 - [Journalists](#)
 - [Green Living](#)
 - [Idaho Families](#)
- TAKE ACTION**
 - [Support The Climate Bill!](#)
 - [More...](#)
- UPDATES BY EMAIL**

Enter Your Email Address To Receive Our

Theory of Change

Goal: Tools to help engage

- E-mail newsletter
- Online donations
 - Memberships
 - General Appeals
- Paid event registration

Why salesforce.com?

- Not open source, but open-ended, customizable platform
- Active development community
- Salesforce Foundation donates 10 user licenses to charitable organizations (worth \$15k/year)
- Managed service == reduced maintenance complexity

**But most of our goals require
integrating multiple tools...**

General strategies

- separation of concerns – small pieces loosely joined
- customization via configuration, not programming
- reusability

E-commerce options

E-commerce options

- Current System was fully integrated
 - Donor Perfect & Weblink
- 3rd Party Standalone options out!
 - GiftTool, Groundspring, etc.
- Salesforce native tools in their infancy
 - PaymentConnect, Chargent, etc.

Additional Considerations

- Costs both upfront and ongoing
(typically 2-5% of transaction depending on the payment gateway)
- Method of funds transfer
- Access to and privacy of donation data
- Integration with your website

GetPaid for Plone

Payment Processor Choice?

- Authorize.net
- Paymentech
- Ogone
- DPS PXPAY
- ClickandBuy
- PayPal
- Google Checkout
- Payflo Pro
- others?

Payment Processor Choice?

- Authorize.net

Sync vs. Async

- Synchronous processors take in all info via Plone and then process via a separate backend request to the processor. (e.g. authorize.net)
- Asynchronous processors redirect the user to the processor's site to collect billing info, then forward back to the store site. (e.g. PayPal Website Payments Standard)

PCI compliance

- The credit card industry has some strict standards for sites that deal with credit card information.

<http://www.pcisecuritystandards.org/>

- Sites that store, process, or *transmit* credit card info should complete a questionnaire and be prepared for a server scan.
- Ask a consultant for advice.

Hosting considerations

- Most VPS providers are not going to certify themselves as PCI compliant.
- If you're accepting credit card info directly rather than sending the user to an offsite processor, you need an SSL certificate ... and a unique IP address per domain.

Configuring Authorize.Net

- Authorize.Net = Payment Gateway
- A new or existing Internet Merchant Account is also needed to connect Authorize.Net to your bank account
- Have on hand all bank account numbers, routing numbers, and credit card merchant numbers before you begin.
- More info: http://www.davemanelski.com/wp-content/uploads/2010/01/Authorize_Net_Configuration.pdf

Lessons/Observations

- Don't underestimate the effort needed to learn new processes and tools
- Don't assume an existing product does everything like you want
- Testing integrations with third-party tools is hard
- Making integrations configurable enough to be reusable increases complexity significantly

The future

GetPaid Roadmap

- More automated form creation for the simple donation use case
- Integration with RSVP for Salesforce

Take action to protect BC's coast from oil spills

Enbridge has a choice

Enbridge is currently planning a project that would bring the first ever Exxon-Valdez sized oil tankers into the treacherous waters of Canada's Pacific coast. The \$5 billion Northern Gateway pipeline and tanker project will ship tar sands crude oil to China and other Asian markets and expose the coast of the world renowned Great Bear Rainforest to the risk of a catastrophic oil spill.

But Enbridge has a choice. Write Enbridge CEO Patrick Daniel and let him know that Enbridge should invest in new green energy projects, not oil tankers. The threat of a catastrophic oil spill on Canada's pacific coast is too great.

Your letter will be sent to the following people:

- Patrick Daniel (CEO, Enbridge Inc.)

Letter Body ■

Please add your own comments, such as your personal or professional background, and your specific concerns. A salutation and signature will be added automatically.

I understand that Enbridge is proposing a tar sands pipeline and tanker project through the world-renowned coast of British Columbia's Great Bear Rainforest; and that this project would take Canadian oil and ship it to China and other Asian markets. Of concern are the inevitable oil spills, which could cause irreparable damage to Canada's Pacific rivers and coastlines.

Enbridge is making significant investments in green energy, especially in Ontario, but these great

Protect our Pacific coast from oil spills

For 37 years the northern coastal waters of British Columbia have been protected from oil tanker traffic. This is now under threat.

Plans to build pipelines and a supertanker port in BC to service the Alberta Tar Sands are moving forward with support from the BC and Canadian Governments.

But there is still time to save our coast.
